Company

For **almost 30 years**, Arblu has been **designing, producing** and retailing **Made in Italy** solutions for bathroom, paying attention to quality, design, research, innovation and contemporary trends in furnishing and wellness. The product range includes shower enclosures, shower trays, furniture, decorative radiators for a complete and coordinated bathroom furnishing.

Building quality of life

We take care of people's wellbeing, making the home a place to enjoy wonderful experiences and pleasure for the senses.

Our focus is on creating the **most advanced solutions** to meet the need to create precious moments for oneself, of relaxation and joy, in the comfort of one's own home that becomes a true oasis of **well-being**.

Thanks to innovation, attention to detail and service of our team of unique people, we build rooms in which to enjoy intensely, always aiming at **sustainability, for people and the environment**.

Mission

We create with **attention to detail, innovation** and vision, delivering a **product of design, functional** and sustainable for the community and the environment.

We work to make the product pleasant, natural and easy to use for those who sell it, those who install it and those who will experience it. We strive to create value with the passion and pride of our unique group of people.

Company Profile

Code of ethics

Arblu has adopted a code of ethics, the organisation, management and control model in accordance with **Legislative Decree 231/01**, whose rules of conduct are inspired by principles and values affirmed not only in official company documents as well as in the management ethics that have characterised the development in almost 30 years of activity.

Quality and certifications

Our entire product range is manufactured in Italy and marked in **CE** accordance with European directives (according to EN **14527** for shower trays, and **EN 14516** for bathtubs).

ISO 9001 and ISO 45001 Certifications

Arblu, with the aim of improving the efficiency of its structure, respecting safety of its employees in the workplace, has received the certification ISO 9001 '**Quality Management Systems**' and ISO 45001 '**Management Systems for the safety protection in the workplace**'.

The certifying body for the integrated system is Bureau Veritas, a world leader in control, verification and certification services for Quality, Health and Safety in companies.

ISO 9001 n° IT335352

ISO 45001 n° IT335349

Sustainability, a concrete value

The **eco-sustainable approach** by companies today cannot be just a trend or a slogan but must be a **conscious choice** implemented at every stage of the product's life, from its conception to its production, delivery and use.

Arblu was one of the first companies in the bathroom industry to commit to this.

We design with attention to detail, innovation and vision, delivering a **product** that is functional and **sustainable for the community and the environment**.

Sustainability Manifesto

On the occasion of the **Festival of the Green Economy**, Arblu joined the **Manifesto of Green Companies** to achieve a series of goals in the coming years that are consistent with the European commitment to **zero CO₂ emissions by 2050** and to implement policies aimed at creating value for the community and the environment.

Green energy in the company

Clean energy is another Arblu's area of interest. The **photovoltaic system** on our headquarters can produce energy to **cover 100% of our energy needs** and in surplus, to be more eco-friendly and reduce unsustainable energy consumption.

Supporting the work of the territory

A hallmark of Arblu is its belief in and support for the **development and enhancement of local companies and workers**, redistributing wealth within the territory.

Our shower trays are conceived, designed and engineered by the Arblu team and produced by local suppliers (within 50 km of our headquarters).

Certified and durable materials

From **selected and certified suppliers**, we receive **materials of first choice** to ensure a **long product life**.

Arblu is committed to using a short supply chain. This not only reduces the environmental impact of transport, but it also ensures tighter control and collaboration on product quality.

Ecological packaging

Arblu packaging is tailor-made for our products with recycled and recyclable cardboard, ensuring waste reduction and maintaining a high level of safety during transport. The use of polystyrene as a packaging material has long been criticised due to its poor biodegradability and harmful effects on the environment, so Arblu is working to eliminate it from packaging.

Introduction

 Pietrablu is a surface system developed by Arblu, a leading company in the design, production and retailing of bathroom solutions. An original combination of nature and technology, in different but easy to match textures. Produced by selected suppliers within 50 km of the Arblu headquarters, Pietrablu is a system **completely MADE IN ITALY**.

Pietrablu can be used to produce shower trays, furniture, tops, decorative radiators, washbasins, mirrors, panels and accessories, to achieve a coordinated effect of great aesthetic impact.

Find out more, enter into Arblu's world!

Certifications

For Arblu, quality is not just a product characteristic but an ethos that runs through the entire production process of every shower enclosure and shower tray, radiator and bathroom furniture. The safety of materials is an essential quality in a between product innovation and the interpretation of new needs for personal well-being.

The entire range of Pietrablu shower trays is marked **CE** in compliance with the European directives according to **EN 14527**.

The company has the "Declaration of Performance" which you can find on our website www.arblu.com.

Test	Standard requirement	Assessment
General info and surface aspect	Shower tray surfaces must be visibly smooth, non-absorbent and free of inaccessible corners that would compromise the cleaning	Smooth surface and easily cleanable
Cleaning and water drainage	The water must be completely drained, unless it is not retained by surface tension	Yes
Bottom stability	Following a load test, the shower tray must not show any deformations, cracks or other defects that would obstruct the draining of water	No defects found (Time of application 10 min)
Thermal shocks resistance	Following a test in which hot and cold water is allowed to flow alternately over the surface of the shower tray, no defects or cracks must appear that would impair its use	No defects found
Resistance to chemicals and staining agents	Following the application of specific chemical agents, the surface finish must not show permanent stains or deterioration, i.e. that cannot be removed with water or abrasive substances	Compliant

Slip resistance tests

The entire range of Pietrablu shower trays has been subjected to the slippery test, according to **DIN 51097** and **NF EN 16165**: anti-slip classification of surfaces walked on barefoot on an inclined surface wet with water "contaminated" with a soap solution.

ANGLE OF INCLINATION	CLASSIFICATION	WHERE APPLIED
$\alpha < 12^\circ$	not classifiable	-
 $12^\circ \leq \alpha < 18^\circ$	A	Bathroom floor
 $18^\circ \leq \alpha < 24^\circ$	B	Shower trays
 $\alpha \geq 24^\circ$	C	Particularly sloping areas, subject to water deposits

REACTION OF THE PIETRABLU SHOWER TRAYS TO THE REGULATIONS DIN 51097 AND NF EN 16165:

TEXTURE	SLIP RESISTANCE	ANGLE OF INCLINATION
Trendy	A + B	$\alpha = 23^\circ$
Well	A + B	$\alpha = 23^\circ$
Easystone	A + B	$\alpha = 23^\circ$
Woody	A + B	$\alpha = 22^\circ$
Juta	A + B + C	$\alpha = 27^\circ$

› Our shower trays are designed for fast and optimal water runoff.

In some cases this is achieved after a few uses; it is recommended to wash the surface a few times with water and mild detergents.

Acoustic comfort regulations

Our shower trays guarantee a high standard of acoustic comfort, as they comply with the most stringent European standards (**SIA 181** Swiss regulation, **DIN 4109** German regulation, **ONORM B 8115-2** Austrian regulation).

› Pietrablu shower trays guarantee excellent sound insulation and are perfect in buildings with many floors, both domestic and hotels.

Innovation in shower trays: lighter with maximum performance

After years of studies, tests and research carried out together with our partners, we introduce the evolution of the **Pietrablu Well shower tray**, with a **weight reduction of over 20%** compared to a standard model of the same size. We have worked to meet the real need to simplify the daily work of installers and offer a tangible improvement: a reduction in the weight of the shower tray, which has a significant impact on handling and installation, **while maintaining the same aesthetics, solidity, resistance and technical performance**.

The lighter Well shower trays are **easier to transport, handle and install**, making the installer's daily work less heavy and more convenient, simple and quick. The different shower tray formats allow you to work independently, reducing time and optimising resources.

Exclusive
shower trays
Well

It weighs over 20% less

To develop the lightweight Well shower trays, we worked on the **internal mixture** formula and the **production process** to obtain a lighter shower tray that is just as solid and reliable.

The mass is composed of **pure calcium carbonate** combined with **low-density microspheres developed in the laboratory** that lighten the shower without altering its mechanical properties. This has allowed us to obtain a lighter product without compromising on strength, hardness and stability.

The outer coating is made of **high-quality gelcoat**, applied using advanced technology that guarantees waterproofing, flatness and durability. Every detail combines technology, aesthetics and sustainability in a **product designed and manufactured 100% Made in Italy**.

The lightweight Well shower trays maintain high standards from both a technical and aesthetic point of view and **exceed the requirements of certification standards in terms of durability and ease of cleaning**, ensuring reliable performance over time. Well retains all the technical and functional characteristics of the Pietrablu line: it is non-slip, antibacterial, waterproof, impact-resistant, UV-resistant, thermal shock-resistant and stain-resistant. Well can be cut to size, even on site. It is certified for **acoustic comfort**, a concrete advantage for living comfort in both residential and hospitality settings.

SHOWER TRAYS COMPARISON	STANDARD	LIGHTWEIGHT WELL
Material	Pure calcium powder minerals	Pure calcium powder minerals + low-density microspheres
Density	2,2 kg/dm ³	1,67 kg/dm ³
Slip resistance	A+B	A+B
Durability	No defects found	No defects found
Thermal shock resistance	No defects found	No defects found
Cut in company and on site	Yes	Yes

The lower weight of the shower tray improves logistics management and facilitates transport, reducing energy consumption and helping to **limit the product's ecological footprint**.

We also wanted to reinforce the essence of Well by introducing as standard the **textured drain pipe cover** for the shower tray, coordinated with the surface of the tray, for even greater aesthetic continuity.

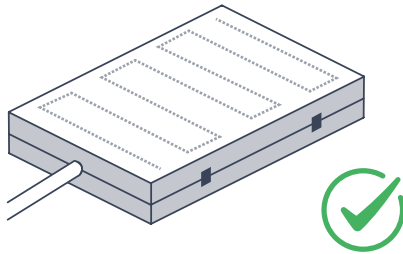

Well shower tray allows you to create a total look bathroom that is consistent in texture and colour thanks to its perfect coordination with the other elements of the Pietrablu system – furniture, tops, panels and radiators.

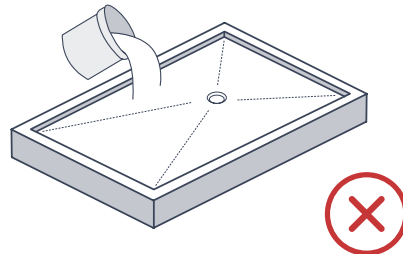

Tecnology of material

Pietrablu shower trays are produced using **state-of-the-art technology** and high-quality material. For their manufacture, **steel moulds** are used, equipped with a **pressure lock**, inside of which a cooling liquid is run that allows optimal temperature control during the moulding process.

ARBLU Closed steel mold with coolant

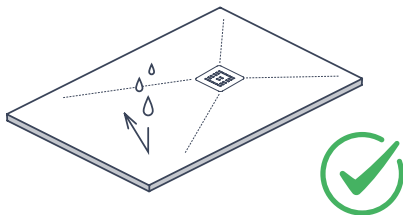

OTHERS Silicone open mould

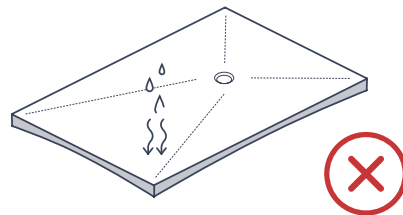

The material, composed of **pure calcium carbonate minerals**, the pressure injection technique and the coating with a **top-quality Gelcoat** film, guarantee flatness, stability and impermeability of the shower tray.

Unlike traditional ones, these special moulds produce **shower trays of excellent quality**; for their realisation it is in fact possible to use only the **quantity of material needed, pure**, without mixing it with aggregates that would make it porous, permeable and unstable. The use of steel, moreover, allows a **perfect** reproduction of the **texture**, guaranteeing an aesthetically impeccable shower tray.

ARBLU Pure, stable and waterproof material

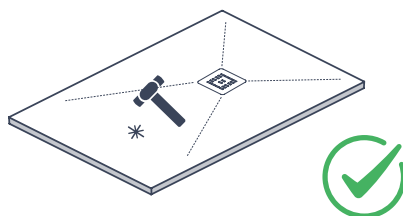

OTHERS Unstable and permeable material

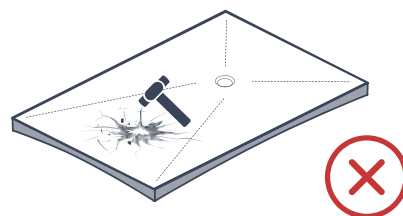

The heat produced inside the mould during the production process triggers a chemical reaction between the Gelcoat and the injected material, melting them together, thus making the shower tray surface **highly resistant** to possible impacts or scratches during installation and use of the shower tray.

ARBLU Resistant surface

OTHERS Fragile surface

The regulation of the cooling flow running through the inside of the mould allows precise temperature control and ensures uniform and constant cooling at every point of the shower tray, guaranteeing total flatness of the resulting product.

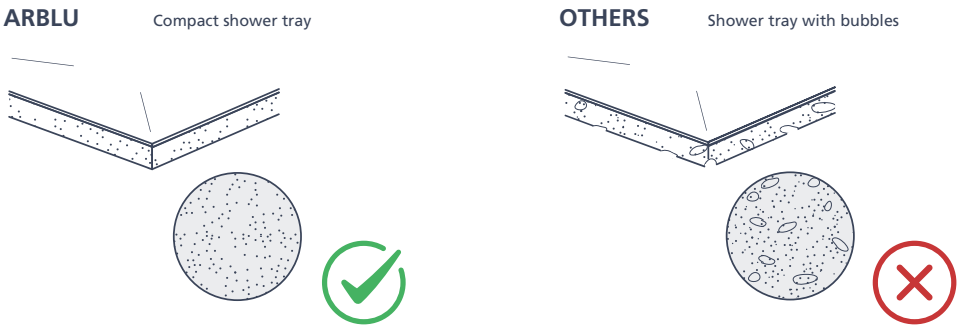

ARBLU Flat shower tray

OTHERS Non-flat shower tray

The quality of the material used and the pressure injection technique also guarantee a compact and bubble-free product, for high strength and a perfect result, which is also visible when the shower tray is cut.

Natural, textured, striking: it's the digital print on Pietrablo

The introduction of **digital printing (Digital Arblu)** on shower trays **Pietrablo Trendy** is a technological innovation achieved thanks to constant investment in research and development by Arblu and its partners, combining **striking aesthetics** with the **texture** and **guarantee of all the** technical and functional **advantages** of **Pietrablo** material.

The finish of the shower tray **decoration** has a **high quality** thanks to **the high definition** of the image used and **meets the aesthetic and design requirements** appreciated by architects, designers and end users.

The digital printing technique is carried out using pigmented ink jets sprayed directly onto the surface of the shower tray with the application of a protective matt finish. Numerous **final checks** are carried out to verify the printed image and, thanks to a spectrophotometer, the colour calibration, ensuring excellent resolution and perfect **realism of the** chosen **decoration**

Pietrablo Trendy Digital Arblu shower trays **exceed the requirements of certification standards** in terms of durability and ease of cleaning, guaranteeing slip resistance, waterproofing, colour fastness and resistance to common household products, just like all Pietrablo shower trays.

•DIGITAL

Exclusive
Trendy
shower
trays

In Trendy shower trays with digital printing, the **drain pipe** cover is **textured as standard** and is also decorated in the same pattern as the shower tray for maximum pleasure in the shower.

Arblu digital decorations are available in various **stoneware finishes** that reproduce the realistic veins, imperfect tones and overall elegant effect of this material. The shower area is transformed into a natural oasis.

Customized and special cut shower trays

Cut is necessary in all those situations where the space does not correspond the shape of the shower tray: irregular walls, non-standard proportions or standard or difficulties related to more complex renovations.

Cut can be realised:

IN COMPANY

- › Matching restored edge
- › In case of cut on the width (P), the drain is not perfectly centered

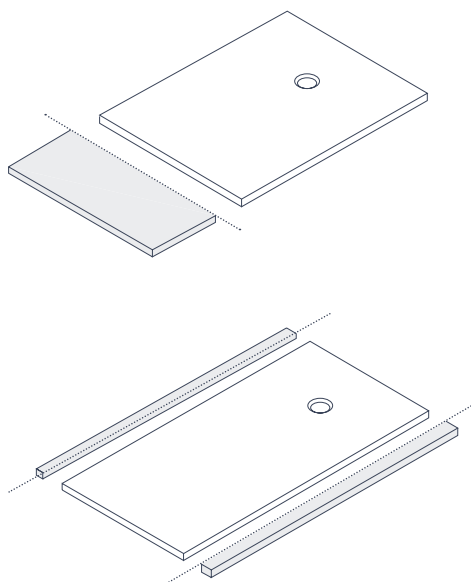

ON SITE

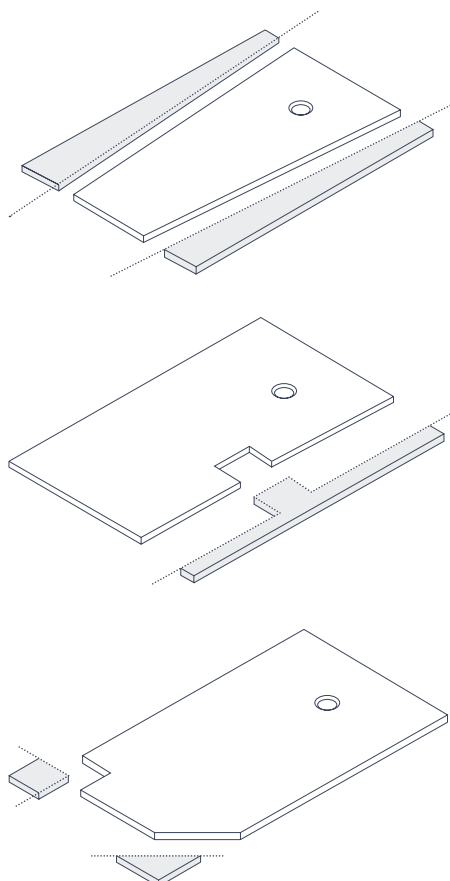

- › Rough edge, to the wall
- › In case of cut on the width (P), the drain is not perfectly centered

SIZE REDUCTION

SPECIAL CUT

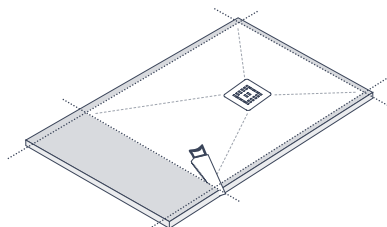

Different possible cut solutions

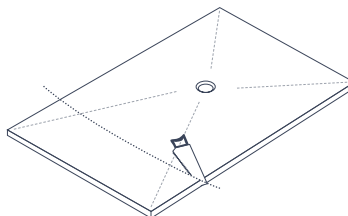

CUT WITHIN THE FLAT PART

Arblu production technology **ensures that our Pietrablu shower trays have a totally flat part**, not present in other trays, which, **in case of a cut in its inside, leads to a perfect aesthetic and functional result** both in contact with a glass of a shower enclosure and close to the wall.

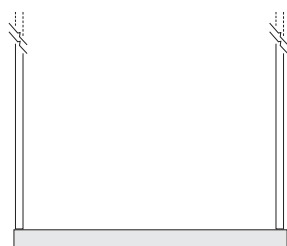

ARBLU

OTHERS

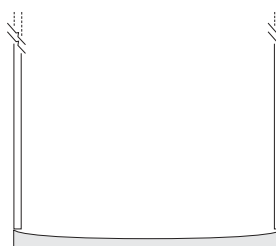

PERFECTLY FLAT SHOWER TRAY

In this case, in Arblu shower trays, there is no need to foam the underside

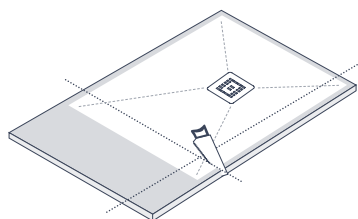

CONCAVE SHOWER TRAY

CUT IN THE SLOPING AREA

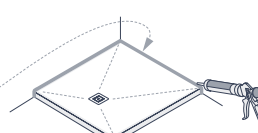

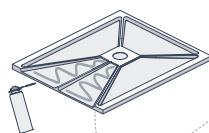

As well as this flat area, cutting is always possible, with the precaution of positioning the side cut, as it is concave, towards the wall and foaming the side underneath. In this way, the shower enclosure will have the space to be properly installed on a perfectly flat surface.

ARBLU

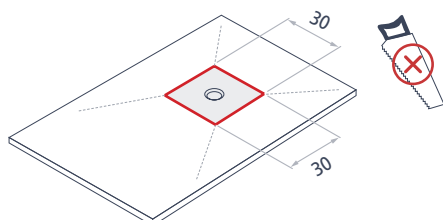

Foam underneath if cut on site

Place the cut side against the wall and silicon the contour as usual

PLEASE NOTE

Avoid cut close to the drain.

Edge and ramp installation shower trays

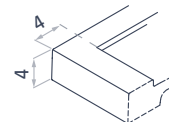

EDGE

The edge is integrated in all the perimeter on the shower tray and its function is to give the user tranquillity in case of possible overflows of water.

The edge is textured or smooth. The application of the edge does not change the size of the tray.
dimensioni del piatto.

When there is a special cut on one side of the shower tray involving the slope, the edge fits the cut design, ensuring the shower tray is perfectly waterproof.

The edge is 4 cm high and 4 cm wide, it can be applied on all sides (1,2,3 or 4 sides) and it is available in all Arblu colours.

Type of shower trays installation

LEANING ON INSTALLATION

The shower tray is installed on the pre-existing flooring, from which it rises a few centimetres to ensure the necessary slope for water flow, but ensuring a fall prevention height.

This type of installation provides an easy positioning for the drain, the siphon and the outflow pipe with its inclination.

Illustrative diagram, further details on dimensions at the end of the section.

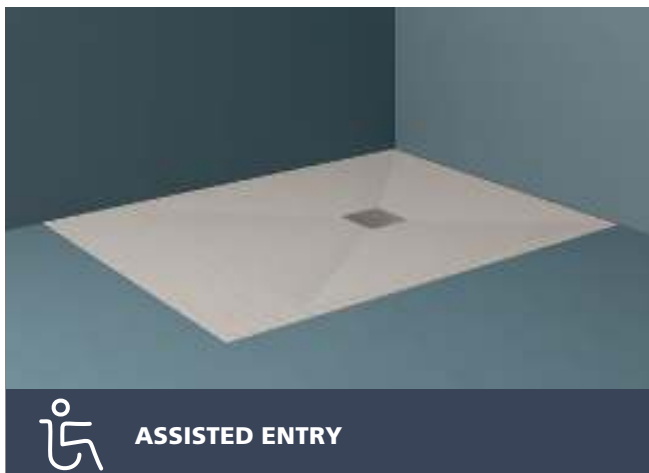

FLUSH WITH FLOOR INSTALLATION

Shower trays installed flush with the floor lend themselves to the most modern interpretations of a design bathroom. This type of installation allows for a continuous surface with the floor.

Before installation it is necessary to check the thickness of the screed with the data sheets.

N.B.: In case of reduced thicknesses Arblu has an optional "Blu Flat" drain pipe.

Illustrative diagram, further details on dimensions at the end of the section.

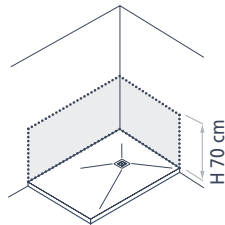

Decorative wall panels

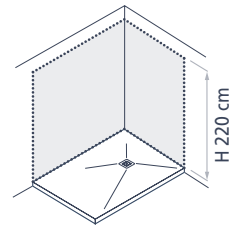

Pietrablu decorative wall panels are ideal for creating a coordinated look by combining them with the shower tray, with tops and sides furniture, with the radiator, washbasin, mirror or accessories.

They are perfect for lining shower walls or, in renovations, for panelling the removal area of the bathtub. They can be used for total or partial panelling of the walls of the room, guaranteeing maximum water resistance and durability.

SIZE REDUCTION AND SPECIAL CUTS IN

Height and width reduction

Diagonal cuts or holes

Cut can be realised:

IN COMPANY

- › It is possible to request a size reduction in width and/or in height or a special cut (diagonal cuts or holes) directly at the moment of the order, sending a drawing.

ON SITE

- › For cutting and/or shaping the panels, it is possible to use tools for aluminium or wood.
- › Cut must be made dry.
- › Panels can be drilled with normal drill bits and/or hollow cutter.

› **Wall panels are always finished in white on the edge!**
Decorative profile or matching silicone are available, for more info see "Installation materials" section.

Products availability

Arblu has over 5,000 shower trays in stock to meet your demands in just a few days. Some shower tray finishes are available immediately, others with a few extra days of waiting. More detailed information can be found by consulting the tables on this price list, based on the following colour legend.

Installation materials

ADHESIVE FOR INSTALLATION

For fixing Pietrablu products we recommend BLU BOND RAPID, a fast and strong adhesive especially produced for Arblu.
Approximately one 300 ml cartridge can be used to create 5 linear metres of adhesive kerb, having a triangular section 10x10 mm (base x height).

Alternatively, MS polymer sealants can be used.
Never use cement-based adhesives.

Restoration

To identify the ideal method for restoring your shower tray in the event of minor scratches, please contact the Arblu after-sales department.

TOUCH-UP MARKER

For deeper scratches, a matching touch-up marker is available.
The touch-up marker for Pietrablu materials is also ideal for finishing panels edges.

Characteristics:

- 

Performance up to 8 linear metres on panel edges.
- 

Quick and easy application, thanks to the spatula shape of the tip..
- 

Available in all Arblu colours.
- 

The high-strength chemical formulation guarantees the durability of the colour.
- 

The marker is useful for touching up and covering any scratches.

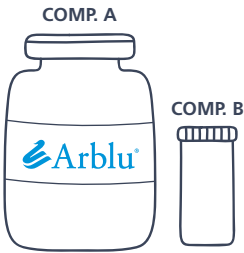

Art.	Description	PRICE
899 16935	Touch-up marker	28

› Always specify the finish

REPAIR KIT

If the surface of a Pietrablu product is clearly and deeply chipped, it must be restored against possible water infiltration.
In this case it is necessary to order a repair kit, in the same colour, which consists of two components: A and B.
The procedure for use and application is indicated in the kit instructions.

Art.	Description	PRICE
899 16937	Repair kit colours RANGE 1 and 2	28
	Repair kit colours RANGE 3	57

› Always specify the finish

› For Well shower trays, in case of deep repairs, it is recommended the use of both repair kits

Cleaning

CLEANING

Instructions for a correct routine cleaning

To remove residues of body products, rinse the shower tray with plenty of water, drying the surface with a soft cloth after every shower.

One-time

1. Ensure that the bathtub is clean and there are no residues of cleaners of various kinds;
2. use anti-limestone products, as long as they are neither aggressive nor abrasive, preferably vinegar-based;
3. rinse the shower tray with plenty of water;
4. dry with a soft cloth.

In case of limescale:

1. Soak a soft cloth in a liquid solution of white vinegar and water and leave for 15/20 minutes, or longer, depending on the need;
2. rinse the shower tray with plenty of water;
3. dry with a soft cloth.

Dark colours, by their nature, show more limescale residues, which are therefore particularly visible.

To avoid this, Arblu recommends always do the routine cleaning and the one-time cleaning every week.

Tecnoblu shower trays

 Tecnoblu (Solid Surface) shower trays have a **2 cm height only**. They are characterized by their **smooth and silky to the touch surface**, in homogeneous paste, non-porous and untreated with paints. They are made through closed moulds, produced by selected suppliers within 50 km of Arblu headquarters, **completely MADE IN ITALY**.

In addition to shower trays, with Tecnoblu also tops, washbasins and mirrors are made in order to achieve a coordinated effect with great aesthetic impact.

Find out more, enter into Arblu's world!

Certifications

For Arblu, quality is not just a product characteristic but an ethos that runs through the entire production process of every shower enclosure and shower tray, radiator and bathroom furniture. The safety of materials is an essential quality in a between product innovation and the interpretation of new needs for personal well-being.

The entire range of Pietrablu shower trays is marked **CE** in compliance with the European directives according to **EN 14527**.

The company has the "Declaration of Performance" which you can find on our website www.arblu.com.

TEST	Standard requirement	Assessment
General info and surface aspect	Shower tray surfaces must be visibly smooth, non-absorbent and free of inaccessible corners that would compromise the cleaning	Smooth surface and easy cleaning
Cleaning and water drainage	The water must be completely drained, unless it is not retained by surface tension	Yes
Bottom stability	Following a load test, the shower tray must not show any deformations, cracks or other defects that would obstruct the draining of water	No defects found (Time of application 10 min)
Thermal shocks resistance	Following a test in which hot and cold water is allowed to flow alternately over the surface of the shower tray, no defects or cracks must appear that would impair its use	No defects found
Resistance to chemicals and staining agents	Following the application of specific chemical agents, the surface finish must not show permanent stains or deterioration, i.e. that cannot be removed with water or abrasive substances	Compliant

Tecnoblu of material

Tecnoblu is a **Solid Surface material** with a natural mineral composition and resins. This mineral composition results in a solid, non-porous, homogenous surface with an opaque white appearance and high strength. Its homogenous structure means that the surface will not deteriorate, peel or flake off and can be recovered and **restored** to its original state. The material is inert, harmless and safe, with no toxicity.

FULL MASS

The Tecnoblu shower tray does not have a coat or skin on the outside or fibres on the inside, so it is not porous and it is a solid mass.

RESISTANCE

Thanks to its homogenous composition throughout its mass, it is resistant to impact, daily use, humidity and temperature changes. The material is very easy to clean and maintain and does not allow the proliferation of bacteria and fungus.

RESTORABLE

Any damage that may be caused by improper use can mainly be repaired on site without replacing the shower tray, simply with a Scotch-Brite® sponge.

SUSTAINABLE

Its production is low-emission and the material is 100% recyclable.

Customized and special cut shower trays

Cut is necessary in all those situations where the space does not correspond the shape of the shower tray: irregular walls, non-standard proportions or standard or difficulties related to more complex renovations.

Cut can be realised:

ON COMPANY

- › Smooth restored edge
- › In case of cut on the width (W), the drain is perfectly centred

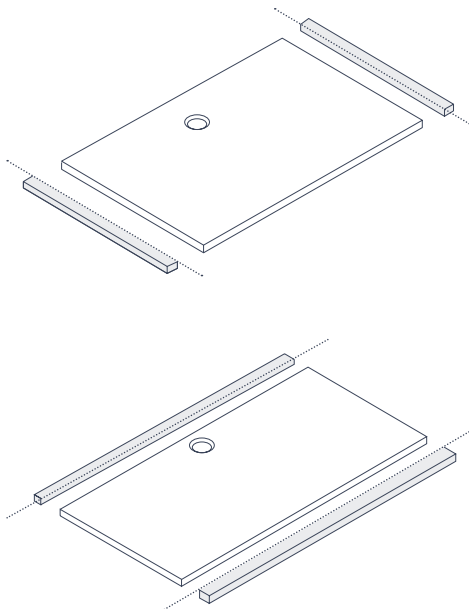

ON SITE

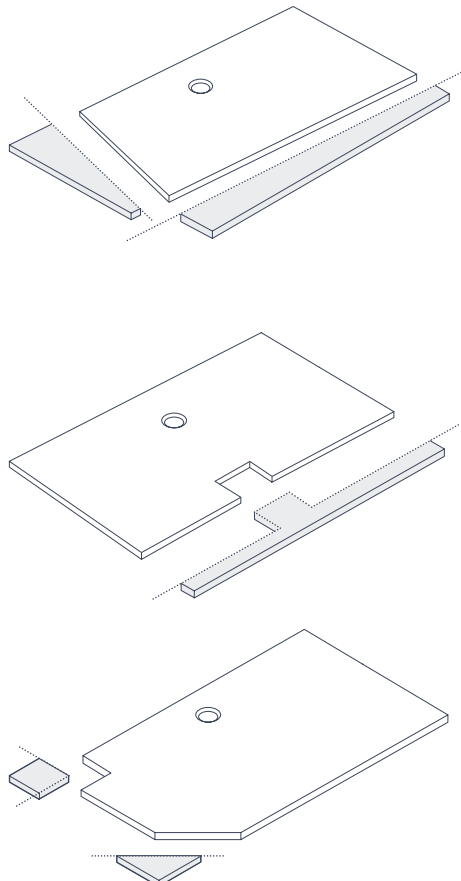

- › Rough edge restorable with Scotch-Brite®
- › In case of cut on the length (L), cut both sides to have the drain perfectly centre

SIZE REDUCTION

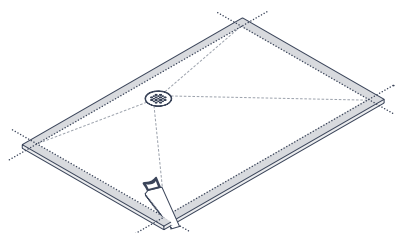

SPECIAL CUT

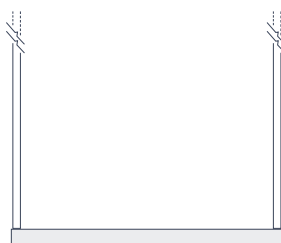

Different possible cut solutions

CUT WITHIN THE FLAT PART

Arblu production technology **ensures that our Pietrablu shower trays have a totally flat part**, not present in other trays, which **in case of a cut in its inside, leads to a perfect aesthetic and functional result** both in contact with a glass of a shower enclosure and close to the wall.

PERFECTLY FLAT SHOWER TRAY

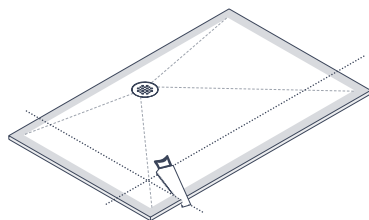

The cut side can be visible as it can be restored

In this case, in Arblu shower trays, there is **no need to foam** the underside

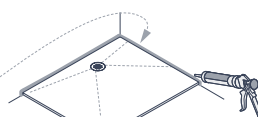

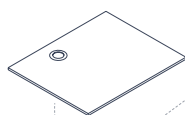

CUT IN THE SLOPING AREA

As well as this flat area, cutting is always possible, with the precaution of positioning the side cut, as it is concave, towards the wall.

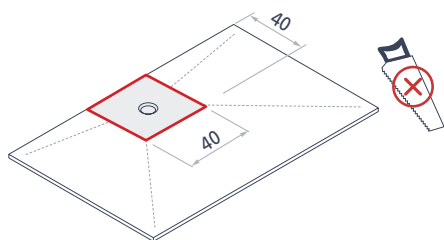

In this case, in Arblu shower trays, there is **no need to foam** the underside

Place the cut side against the wall and silicon as usual

PLEASE NOTE

Avoid cut close to the drain.

Edge installation shower trays

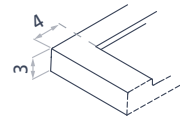

EDGE

The edge is integrated in all the perimeter on the shower tray and its function is to give the user tranquillity in case of possible overflows of water.

The edge is smooth. The application of the edge does not change the size of the tray.

When there is a special cut on one side of the shower tray involving the slope, the edge fits the cut design, ensuring the shower tray is perfectly waterproof.

The edge is 3 cm high and 4 cm wide, it can be applied on all sides (1,2,3 or 4 sides) and it is available in all Arblu colours.

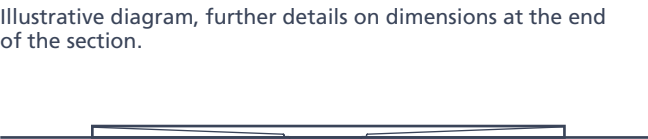

Examples

Type of shower trays installation

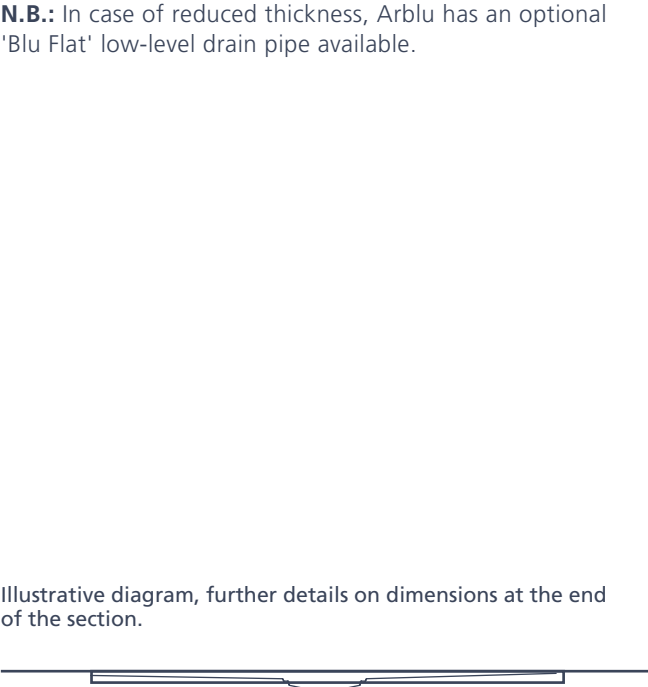

LEANING ON INSTALLATION

The shower tray is installed on the pre-existing flooring, from which it rises a few centimetres to ensure the necessary slope for water flow, but ensuring a fall prevention height. This type of installation provides an easy positioning for the drain, the siphon and the outflow pipe with its inclination.

FLUSH WITH FLOOR INSTALLATION

Flush-floor installed shower trays can be used for the most modern interpretations of a design bathroom. This type of installation allows for a continuous surface with the floor. Before installation, it is necessary to check the thickness of the screed with the technical data sheets.

Products availability

Arblu has over 5,000 shower trays in stock to meet your demands in just a few days. More detailed information can be found by consulting the tables on this price list, based on the following colour legend.

TYPE OF INSTALLATION

Velvet shower tray

Leaning on installation

Velvet shower trays can be installed leaning on the floor; the 2 cm height may prevent the falls.

Flush with floor installation

For a continuity with the floor, without any obstacle, you can choose a flush with floor installation.

Installation materials

ADHESIVE FOR INSTALLATION

For fixing Tecnoblu products we recommend BLU BOND RAPID, a fast and strong adhesive especially produced for Arblu.

Approximately one 300 ml cartridge can be used to create 5 linear metres of adhesive kerb, having a triangular section 10x10 mm (base x height).

Alternatively, MS polymer sealants can be used. Never use cement-based adhesives.

Art.	Description	PRICE

Cleaning and restoration

CLEANING

Instructions for a correct routine cleaning

To remove residues of body products, rinse the shower tray with plenty of water, drying the surface with a soft cloth after every shower.

For stains caused by limescale or body products:

1. use anti-limescale products, including vinegar-based products;
2. rinse the shower tray with plenty of water ;
3. dry with a soft cloth.

For stains of different nature:

1. use chlorine-based cleaners or bleach, even in powder;
2. if necessary use a Scotch-Brite® sponge;
3. rinse the shower tray with plenty of water;
4. dry with soft cloth.

Arblu suggests routine cleaning after each use and a deeper cleaning every week. To enhance the typical satin finish, wipe occasionally with a Scotch-Brite® sponge, applying a circular motion.

RESTORATION

In case of scratches on the surface, use a fine abrasive paper (400 o 500) or a Scotch-Brite® sponge depending on the damage, together with any powdered cleaner.

Ceramic shower trays

 Ceramic shower trays are carefully handcrafted according to the best traditions of **Made in Italy**.

Ceramic is an extraordinary material for shower trays, making it an ideal option for those looking for high functional efficiency.

Thanks to technology and innovation, ceramic shower trays are synonymous with quality and durability, ensuring a product that is resistant to everyday use with minimal and subtle design that fits perfectly into any bathroom style.

Extensive study of the ceramic material and its processing has resulted in shower trays that have a greater slope than standard shower trays, ensuring efficient drainage and preventing water stagnation.

Certifications

For Arblu, quality is not just a product characteristic but an ethos that runs through the entire production process of every shower enclosure and shower tray, radiator and bathroom furniture. The safety of materials is an essential quality in a between product innovation and the interpretation of new needs for personal well-being.

The entire range of Pietrablu shower trays is marked **CE** in compliance with the European directives according to **EN 14527**.

The company has the "Declaration of Performance" which you can find on our website www.arblu.com.

Test	Standard requirement	Assessment
General info and surface aspect	Shower tray surfaces must be visibly smooth, non-absorbent and free of inaccessible corners that would compromise the cleaning	Smooth surface and easy cleaning
Cleaning and water drainage	The water must be completely drained, unless it is not retained by surface tension	Yes
Bottom stability	Following a load test, the shower tray must not show any deformations, cracks or other defects that would obstruct the draining of water	No defects found (Time of application 10 min)
Thermal shocks resistance	Following a test in which hot and cold water is allowed to flow alternately over the surface of the shower tray, no defects or cracks must appear that would impair its use	No defects found
Resistance to chemicals and staining agents	Following the application of specific chemical agents, the surface finish must not show permanent stains or deterioration, i.e. that cannot be removed with water or abrasive substances	Compliant

Introduction and certifications

 Arblu bathtubs are produced by selected suppliers within 50 km of Arblu headquarters, the materials used are **completely MADE IN ITALY**.

For Arblu, quality is not just a product characteristic but an ethos that runs through the entire production process of every shower enclosure and shower tray, radiator and bathroom furniture. The safety of materials is an essential quality in a between product innovation and the interpretation of new needs for personal well-being.

The entire range of Arblu bathtubs is marked **CE** marked in compliance with the European directives according to **EN 14516**.

Tecnology of material

TECNOBLU

Tecnoblu is a solid material (Solid surface) made from closed moulds and composed of mineral fillers and resins; this material has a smooth, non-porous surface, coloured in a homogeneous paste and not treated with paints.

GEABLU

Geablu is a material made from closed moulds and composed of natural minerals and resins; this material has a smooth, non-porous surface covered with a Gelcoat surface film.

Cleaning and restoration

TECNOBLU

CLEANING

Instructions for a correct routine cleaning

To remove residues of body production, rinse the shower tray with plenty of water, drying the surface with a soft cloth after every shower.

For stains caused by limescale or body products:

1. use anti-limescale products, including vinegar-based products;
2. rinse the shower tray with plenty of water;
3. dry with a soft cloth.

For stains of different nature:

1. use chlorine-based cleaners or bleach, even in powder;
2. if necessary use a Scotch-Brite® sponge;
3. rinse the shower tray with plenty of water;
4. dry with soft cloth.

Arblu suggests routine cleaning after each use and a deeper cleaning every week.

To enhance the typical satin finish, wipe occasionally with a Scotch-Brite® sponge, applying a circular motion.

RESTORATION

In case of scratches on the surface, use a fine abrasive paper (400 o 500) or a Scotch-Brite® sponge depending on the damage, together with any powdered cleaner.

GEABLU

CLEANING

Instructions for a correct routine cleaning

To remove residues of body products, rinse the bathtub with plenty of water, drying the surface with a soft cloth after each use.

One-time

1. Ensure that the bathtub is clean and there are no residues of cleaners of various kinds;
2. use anti-limestone products, as long as they are neither aggressive nor abrasive, preferably vinegar-based;
3. rinse the shower tray with plenty of water;
4. dry with a soft cloth.

In case of limescale:

1. Soak a soft cloth in a liquid solution of white vinegar and water and leave for 15/20 minutes, or longer, depending on the need;
2. rinse the shower tray with plenty of water;
3. dry with a soft cloth.

Dark colours, by their nature, show more limescale residues, which are therefore particularly visible.

To avoid this, Arblu recommends always do the routine cleaning and the one-time cleaning every week.

RESTORATION

For small scratches use Scotch-Brite® or sand with very fine sandpaper (800-1000 grit) until the surface is completely even.

For deeper scratches, a matching touchup marker can be requested (see the "Restoration" section on Pietrablu shower trays for the price).

General sales conditions (GSC)

The following terms and conditions are considered as fully accepted by the Buyer at the time when the order is placed.

1. Acceptance

- a. We accept orders only in a written form. Each order is accepted with "acceptance reservation" by our company, hereafter referred to as Arblu srl.
- b. Orders can also be processed partially. Any contribution to the transport costs will be charged according to the ongoing agreed sales conditions.
- c. We do not dispatch orders below the amount of 100 € net.

2. Cancellations / Changes

- a. Upon receipt of the order, Arblu issues the "Order Confirmation" which can be modified and / or canceled within 1 day of receipt. Subsequently, cancellations and / or variations will not be accepted.

3. Product features and modifications

- a. Arblu srl reserves the right to make suitable changes to products at any time and without prior notice, without compromising their main features.
- b. Light, vapors and other environmental factors can lead to changes in tones and colour that might not guarantee the perfect colour matching for items purchased at different times. Should these differences occur, these cannot be object of dispute.

4. Prices

- a. All prices contained in this pricelist are expressed in Euros. Prices indicated are meant under EXW Fontanafredda, Italy delivery terms, VAT and installation not included. Delivery occurs at the prices indicated in the price list that is valid on the date indicated in the Order Confirmation.
- b. Prices can be changed at any time without prior notice. Any typing errors in prices and / or omissions in this price list do not bind Arblu srl to the Buyer.
- c. In the case the clients have different tax systems from the ones usually applied, Arblu srl needs to receive in written form all the information before sending the Order Confirmation, otherwise all amounts are subject to the usual imposition of laws in force at the time of sale.

5. Delivery

- a. The dates for delivery are not binding and in no case constitute grounds for late payments and / or claim for damages. The supply takes place at the earliest opportunity, subject to stock availability and production capability. The terms of delivery are suspended for fortuitous events and "force majeure" and/or any unpredictable event outside the control of Arblu srl. The time of delivery will be suspended from the day of the impediment.

6. Transport

- a. Regardless the agreements made on transport costs, and/or payment terms and/or eventual delivery of documents, the passage of transport risks is meant under EXW (Incoterms 2010) delivery terms, with loading the products on means of transport intended for the Buyer. Therefore any complaint must be addressed by the Buyer to the Carrier, even if the transport has been commissioned by Arblu srl. The recipient is namely obliged to check the incoming goods and to notify any possible damage to the Carrier. When the carrier delivers the goods, any damaged packages may be withdrawn by indicating on the delivery NOTES remarks the wording "subject to verification." Within 48 hours the Customer can notify the damage to the Carrier; after this time Arblu srl reserves the right not to acknowledge any compensation for noticed damages and/or breakages.

7. Installation and assembly

- a. Installation of our products must be carried out by professional personnel, by following the instructions delivered together with the products, the relevant technical documentation and according to the laws and regulations governing the implementation of this type of activity. The Buyer assumes all responsibility for faults and / or defects in installation and for any violation of the above provisions. Arblu srl does not take any responsibility for wrong or incorrect installation of the delivered products.

8. Tolerance

- a. All items can have a tolerance of +/-1% compared to the ordered size.

9. Complaints

- a. Any non-conformity, fault or defect shall be reported within 8 (eight) days from delivery, under penalty of revocation. Any non-conformity, fault or defect hidden at the time of receipt of the goods shall be reported within 8 (eight) days from their discovery.

10. Returned goods

- a. No items can be returned without the express authorization of Arblu srl
- b. Authorized returns must be consigned to Arblu srl on DAP delivery terms basis, they will be in any case charged by 20% costs as well as any repair costs for any possible damage caused by negligence of the Customer.
- c. The goods immediately identified as damaged and replaced by the supplier have to be returned within 30 days from their replacement. Beyond that date Arblu srl will be forced to issue an invoice for the replaced goods at current price list.

11. Warranty

- a. The products will be suitable for the use they are normally intended for and will be guaranteed by non-conformity and defects in material and workmanship. In any case, measurements, tints, colors, illustrations and drawings on catalogues and/or samples will be merely indicative. The warranty only covers the replacement of products and parts which we acknowledge as being defective. The normal degradation and wear of the products, as well as any defect or lack of quality due or influenced by incorrect storage, are excluded from the warranty and liability of Arblu srl. The warranty does not cover damage to products that have been tampered with by the Buyer and / or third parts, installed and / or used not in accordance with the operating conditions supplied with the product. Under no circumstances will warranty service be provided 24 months after delivery, for Pietrablu shower trays and wall panels there is a 5-year warranty.

12. Payments and overdue interests

- a. The payment deadline will be strictly observed, the possible acceptance of credit by Arblu srl is always subject to collection, without any renewal of the relationship and without modification of the competent Court. If payment is not done at the foreseen date, Arblu srl will apply the interests established by Italian Legislation in compliance with European Directives 2000/35/CE and 2011/7/UE and without prejudice to the right of Arblu srl to declare the contract terminated and request compensation for damages. Arblu srl will have the right to suspend any delivery, without prior notice, making void the ongoing order for the part not yet delivered due to the fault of the Buyer. In no event will the Buyer be allowed to suspend or delay payments, even in the event of dispute, complaint or controversy.
- b. In the event of termination of the contract or cancellation or withdrawal of the Buyer, Arblu may withhold any deposit fees collected as penalty as a partial compensation of contractual obligations not complied with by the Buyer, except a greater damage caused.

13. Cautions

- a. Arblu srl may suspend deliveries in case the worsened economic conditions of the Buyer may compromise the payment and there is a danger of not obtaining payment: in the case of deferred payments, failure to timely comply with the deadlines established legitimate Arblu srl to demand immediate payment of the entire remaining price.

14. Retention of title

- a. The sale is made subject to property (Article 1523 et seq CC), so the products remain the property of Arblu srl until full payment of the price.
- b. Payments are not recognized if made to agents, representatives, producers and salesmen without the written permission from Arblu srl.
- c. The goods will become property of the Buyer only after their regular, full payment. The Buyer has no right to sell, pledge, guarantee, lease, otherwise the goods to a third person before this deadline. In case of failure and / or delayed payment, Arblu srl reserves the right to recover the goods.
- d. In the event that the Buyer has sold the products before their full payment, Arblu srl will automatically have the right to subrogation to the Buyer's rights to the third buyer and any proceeds from the sale will be held by the Buyer in the name and account of Arblu srl, the latter being readily transmitted. In any case the risks arising from loss or damage for any cause suffered by the products will be borne by the Buyer.

15. Use of trademarks and images

- a. any kind and form of use of trademarks and names of Arblu srl property, as well as links, images, photos and files must be authorized in advance in written form by Arblu srl.

16. Applicable Law and Jurisdiction

- a. These terms and conditions are governed by the Italian Law and the Court of Pordenone (Italy) has competence for any controversy. Arblu srl will have the right to refer, at its discretion, to the competent Court where the Buyer is located.

17. Validity

- a. This price list comes into effect starting from 20th November 2025.
