Faktorji vodotesnosti tuš kabin po modelih

Factors affecting water tightness of shower cabins according to models

Čimbenici vodonepropusnosti tuš kabina po modelima

Faktori koji utiču na vodonepropusnost tuš kabina u zavisnosti od modela

Kljub tesnilom na tuš kabini voda še vedno izteka. Je to normalno?

Despite the sealants on my shower enclosure, water still leaks. Is this normal?

Unatoč brtvilima na tuš kabini voda još uvijek otječe. Je li normalno?

Bez obzira na zaptivke na tuš kabini voda i dalje curi. Da li je to normalno?

Tuš kabine ponujajo različne stopnje vodotesnosti, vendar popolne zaščite proti uhajanju vode ni mogoče zagotoviti.

Shower enclosures come in various levels of water resistance. However, nobody can ensure total protection against water leakage.

Tuš kabine nude različite stupnjeve brtvljenja, ali potpunu zaštitu od otjecanja vode nije moguće osigurati.

Tuš kabine nude različite nivoe zaptivanja, ali se potpuna zaštita od curenja vode ne može obezbediti.

F 1

Faktor 1

Modeli tuš kabin v izvedbi z aluminijastim okvirjem

Ti modeli omogočajo posebno dobre vodotesne lastnosti. Priporočajo se za prhanja z večjo frekvenco in uporabo masažnih prh z veliko količino vode.

Faktor 1

Shower cabin enclosures featuring an aluminium frame

These models feature particularly good water tightness characteristics and are recommended for more frequent showers and use of massage showers consuming large quantities of water.

Čimbenik 1

Modeli tuš kabina u izvedbi s aluminijским okvirom

Ti modeli omogućuju posebno dobra vodonepropusna svojstva. Preporučuju se za tuširanja s većom frekvencijom i uporabom masažnih tuševa s velikom količinom vode.

Faktor 1

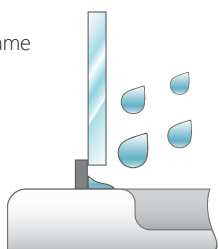

Modeli tuš kabina u izvedbi sa aluminijumskim okvirom

Ti modeli omogućavaju posebno dobre osobine u pogledu zaptivanja. Preporučuju se za tuširanja sa većom frekvencijom i korišćenje masažnih tuševa sa velikom količinom vode.

Kabine s spodnjim okvirjem
Enclosures with the bottom frame
Kabine s donjim okvirom
Kabine sa donjim okvirom

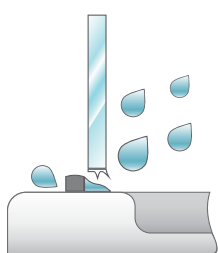

F 1

Dodatni zaštitni profil
Additional protection profiles
Dodatni zaštitni profil
Dodatni zaštitni profil

F 2

Kabine brez okvirja
Enclosures without a frame
Kabine bez okvira
Kabine bez okvira

F 3

F 2

Faktor 2

Modeli tuš kabin z dodatnim zaščitnim profilom

Dodatno nameščen profil izboljšuje stopnjo zaščite vodotesnosti, vendar je ne more 100% zagotoviti.

Faktor 2

Shower enclosures models with an additional protection profile

Additionally installed profile improves the water tightness protection level, but it cannot guarantee it 100 %.

Čimbenik 2

Modeli tuš kabina s dodatnim zaštitnim profilom

Dodatno postavljen profil poboljšava stupanj zaštite vodonepropusnosti, ali ju ne može 100% osigurati.

Faktor 2

Modeli tuš kabina sa dodatnim zaštitnim profilom

Dodatno montiran profil poboljšava stepen zaštite u pogledu zaptivanja, ali ga ne može garantovati 100%.

F 3

Faktor 3

Modeli tuš kabin v izvedbi brez aluminijastega okvirja

Imajo zadovoljivo stopnjo zaščite vodotesnosti. Zaradi manjkajočega spodnjega okvirja, ima voda možnost lažjega iztekanja. Kljub temu so ti modeli kabin elegantni, ekskluzivni in omogočajo lažje čiščenje.

Faktor 3

Shower enclosures models without an aluminium frame

They provide a satisfactory water tightness protection level. Since the bottom frame is missing, water can more easily leak out. Nevertheless, these cabin models are elegant, exclusive and are easier to clean.

Čimbenik 3

Modeli tuš kabina u izvedbi bez aluminijaskog okvira

Imaju zadovoljavajući stupanj zaštite u smislu vodonepropusnosti. Zbog manjkajućega donjeg okvira voda ima mogućnost lakšega istjecanja. Unatoč tomu ti su modeli kabina elegantni, ekskluzivni i omogućuju lakše čišćenje.

Faktor 3

Modeli tuš kabina u izvedbi bez aluminijumskog okvira

Imaju zadovoljavajući stepen zaštite u pogledu zaptivanja. Zbog nepostojećeg donjeg okvira, voda ima mogućnost lakšeg oticanja. Bez obzira na to, ti modeli kabina su elegantni, ekskluzivni i omogućavaju lakše čišćenje.

Design tuš zaslonov odreja stopnjo vodotesnosti. Osnovno pravilo je: čim večji in višji je spodnji profil, toliko je višja stopnja zaščite.

The design of the shower screens determines the water tightness. The basic rule: the larger and taller the middle profile, the higher the protection level.

Dizajni tuš zaslona određuju stupanj vodonepropusnosti. Osnovno je pravilo: što je veći i viši donji profil, toliko je viši stupanj zaštite.

Dizajn tuš paravana određuje stepen zaptivanja. Osnovno pravilo je: što je viši i veći donji profil, veći je i stepen zaštite.

Pogosta vprašanja - tuš kabine

FAQ - Shower Enclosures

Učestala pitanja - tuš kabine

Česta pitanja - tuš kabine

121

Katere prednosti prinaša zaščita stekel Clean Coat pri tuš kabinah?

What are the advantages of Clean Coat-protected glass for shower enclosures?

Koje prednosti donosi zaštita stakla Clean Coat a kod tuš kabina?

Koje prednosti donosi zaštita stakala Clean Coat kod tuš kabina?

Prednosti zaštite stekel tuš kabin:

- **estetske:** čist in svetleč izgled, ki traja dlje časa. Zaradi odpornosti proti umazaniji, madežem in potemnenju, se podaljša prvotni videz
- **funkcionalne:** omogoča zelo preprosto čiščenje
- **higijske:** omogoča hitrejše splakovanje, ki odstrani umazanijo, sol in bakterije in za sabo ne pušča usedlin in ostankov. Če je steklena površina dlje časa izpostavljena vodi, olajša odstranitev usedle umazanije z večkratnim umivanjem.
- **ekološke:** manjša uporaba bolj agresivnih čistil

Advantages of shower enclosure glass-protection:

- **Aesthetics:** clean and shiny appearance that lasts longer; the resistance to dirt, stains and dark blotches prolongs its original appearance.
- **Functionality:** extremely easy to clean
- **Hygienic aspect:** enables faster rinsing, to remove dirt, salt and bacteria, and leaves no deposits and remains. If the glass is exposed to water for a longer period of time, it facilitates removal of deposited dirt through multiple washing.
- **Ecological aspect:** reduces use of more aggressive cleaning agents.

Prednosti zaštite stakala tuš kabina:

- **estetske:** čist i svjetleći izgled koji traje duže vremena. Zbog otpornosti na nečistoće, mrlje i tamnjenje produžuje se prvobitni izgled
- **funkcionalne:** omogućava vrlo jednostavno čišćenje
- **higijenske:** omogućava brže ispiranje koje uklanja nečistoće, sol i bakterije te za sobom ne ostavlja talog i ostatke. Ako je staklena površina duže vrijeme izložena vodi, olakšava uklanjanje nataložene nečistoće koja je nastala višekratnom uporabom.
- **ekološke:** manja potrošnja agresivnijih sredstava za čišćenje

Prednosti zaštite stakala tuš kabina:

- **estetske:** čist i sjajan izgled koji traje duže vreme. Zbog otpornosti na prljavštinu, fleke i potamnjanje prvobitni izgled duže traje
- **funkcionalne:** omogućava vrlo jednostavno čišćenje
- **higijenske:** omogućava brže ispiranje koje uklanja prljavštinu, so i bakterije i iza sebe ne ostavlja naslage i ostatke. Ukoliko je staklena površina duže vreme izložena vodi, olakšava uklanjanje naslaga prljavština višekratnim pranjem
- **ekološke:** manja potrošnja agresivnijih sredstava za čišćenje
